Item 12:

Remarks: Water applied for herewith will be commingled with water from 9 other concurrent basin #73 applications, & subsequent applications in Nevada. Water treatment may be required, & extensive groundwater hydrology & test drilling by GHC is anticipated to confirm source suitability & to insure proposed beneficial use will not damage others. Direct pipeline transmission to the Washoe Front is anticipated with exchange options on the lower Carson-Truckee System possible-subject to drought year water being available up-stream, in-stream beneficial uses, & TCID. Total project cost will be in the order of \$75,000,000 for annual consumptive use of 20,000 AF. All applications are on BLM land & use permits are in progress.
